EXAMINER'S AMENDMENT

In the course of examination, it was determined that the elected group comprised two distinct methods.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 4,5, 8, 31- 35, and 39- 44, drawn to a method to determine the change of status from pre-Multiple Myeloma (MM) related condition to developing MM, classified in class 435, subclass 4.
- II. Claims 15, 37, and 38, drawn to a method to determine improvement of status of a Multiple Myeloma (MM) patient undergoing therapy, classified in class 435, subclass 4.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the first method requires the detection of IL-6 as an indication of MM and the second requires that this level determine improved status of MM in patients undergoing therapy. The methods have different steps (what samples are compared) and have different results (the assays determine different end points). The starting populations used in each method are different.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

During a telephone conversation with Elizabeth Kaytor on 9/29/04 a provisional election was made without traverse to prosecute the invention of Group I.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Elizabeth Kaytor on 9/29/04. The application has been amended as follows:

Claims 15, 37, and 38 were canceled.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Myron G. Hill whose telephone number is 571-272-0901. The examiner can normally be reached on 9am-6pm Mon-Fri.
